PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience specializing in backend development, API design, and scalable web systems. Experienced in building full-stack applications using Django, Node.js, and modern JavaScript frameworks. Proven ability to design secure authentication systems, optimize backend performance, and deploy containerized applications. Passionate about building efficient digital platforms that solve real-world problems.

CORE SKILLS

- Backend System Development (Node.js, Django)
- Frontend System Development (TypeScript, Tailwind CSS, React)
- ERP Integration & Legacy System Support
- Secure API Architecture & RESTful Services
- Role-Based Access Control (RBAC)
- Production System Support & Incident Resolution
- Workflow Automation & Process Optimization
- Cloud & DevOps: AWS, Azure, Docker, GitHub Actions
- CI/CD: GitHub Actions
- Infrastructure Collaboration (Networking & Servers)
- Institutional Compliance & System Documentation

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, TypeScript
- **Backend Frameworks:** Django, Node.js, Laravel, FastAPI, REST APIs
- **Frontend & Mobile:** React-Native, TypeScript, React, TailwindCSS
- **Databases:** PostgreSQL, MySQL, MongoDB, Supabase
- **Cloud & DevOps:** Docker, GitHub Actions, CI/CD, AWS, Azure
- **Networking & Infrastructure:** Routing & Switching, VLAN Configuration, Network Administration
- **Tools & Platforms:** Git, GitHub, VS Code, PyCharm
- **Security:** RBAC, Secure Authentication, API Security
- **Testing:** Pytest, Swagger, PostMan

PROFESSIONAL EXPERIENCE

Network Administrator

Pax Manor Muthaiga — Nairobi, Kenya

Full-Time | Jan 2025 – May 2025

- Administered network infrastructure including routing, switching, and VLAN configuration to maintain stable connectivity.
- Implemented network security practices and access controls for internal systems.
- Supported deployment and maintenance of internal systems used for operations.
- Monitored network performance and resolved connectivity issues to ensure uninterrupted service delivery reducing downtime by over 30%
- Strengthened operational continuity through improved infrastructure reliability.

Teqova — Software Developer (Contract)

Remote | Feb 2025 - Jun 2025

- Contributed to development of a cloud storage platform enabling secure client file backup and sharing.
- Integrated secure authentication and API endpoints.
- Utilized GitHub-based pull request workflows and CI/CD pipelines.
- Provided post-deployment production support and bug resolution.
- Improved client data accessibility by 40%.

ICT Support / Systems Assistance (Industrial Attachment)

Kenya Copyright Board - Nairobi, Kenya

Full-Time | May 2024 – Sept 2024

- Contributed to ERP system development and integration with legacy institutional software.
- Provided technical support for ERP systems used in operational workflowsthrough automation reducing manual data processing by 75%.
- Implemented structured system updates aligned with compliance requirements.
- Improved reporting accuracy and reduced manual entry time by 25%.

- Supported production system stability and user issue resolution.
- Assisted in administration and maintenance of institutional ICT systems and network infrastructure.

I.V.Y Community — Mobile Application Developer (Contract, Part-Time)

Contract | Jul 2025 – Present | Remote

- Developed and deployed mobile applications using React Native, Supabase, and Node.js.
- Implemented secure role-based authentication and protected API endpoints.
- Supported iterative updates based on stakeholder feedback.
- Collaborated in testing, deployment, and system performance monitoring.

Mihang'o Technical Training College — Software Developer & IT Lecturer

Full-Time | 2025 – Present | Nairobi, Kenya

- Lead development and maintenance of an integrated School Management System (SMS) with embedded Learning Management System (LMS).
- Designed backend services using Node.js and PostgreSQL to enhance academic record management and reporting.
- Implemented role-based access controls for administrators, teachers, parents, and students.
- Improved digital record accessibility and institutional reporting efficiency.
- Deliver instruction in modern web development practices aligned with industry standards.

PROJECTS & AUTOMATION

Pharmanect — Pharmacy Management Platform

Tech Stack: Django, PostgreSQL, REST API

- Developed and deployed a secure pharmacy ordering and tracking platform.
- Developed backend services using Django and PostgreSQL.
- Implemented authentication, order workflows, and API integrations.
- Developed backend APIs to manage inventory and order workflows.

Site-Link Logistics Platform

Tech Stack: Next.js, Supabase, React, TypeScript, Google Maps API

- Developed a logistics coordination platform integrating location services for shipment tracking.
- Implemented backend APIs to manage logistics operations and user requests.
- Integrated Google Maps API to visualize routes and delivery locations.

Dreamscape Realty

Tech Stack: Supabase, Django, TypeScript, React, TailwindCSS

- Built a secure real estate management platform using Django, PostgreSQL and Next.js Stacks.
- Implemented data validation and access control mechanisms.
- Implemented AI chatbot for quick search and query.
- Implemented property listings with location data, property images, and floor details.
- This increased property search by over 40% and reduced fraud by over 60%

EDUCATION

Bachelor of Science in Computer Science

The Cooperative University of Kenya — Nairobi, Kenya

2021 – 2025 Second Class Honors (Upper Division)

CERTIFICATES

Huawei Certified ICT Associate (HCIA) – Networking Essentials 2025

Full Stack Web Development eMobilis Technology Institute 2024
